

## DATA LOGGER LR5000 Series

Data Loggers 

### Complete Line of Easy-to-Use Compact Loggers with Expanded Memory

The new HIOKI compact data logger series easily records temperature, voltage, current, and instrumentation signals over long periods. Carried over from its highly reputed predecessor, this series includes features and functions such as 7 times the recording capacity of former models, data import during recording, continuous measurement even during battery replacement, and intuitive PC software. Flexible and easy-to-use at single and multiple locations, the new HIOKI compact data logger series is ideal for any application that requires simple set-up but long-term, reliable recording capabilities.

# Meet a Wide Variety of Data Logging Applications

## Temperature Logger /Humidity Logger

Manage the temperature and humidity in offices and factories. Visually monitor the data to save on air-conditioning and heating costs.

## Instrumentation Logger / Voltage Logger

Record fluid flow such as for water, gas and oil. Measure flow meter output signals to monitor flow trends.

## Clamp Logger

Manage the current consumption of plant and building equipment. Visually monitor power costs to efficiently conduct energy- and cost-saving activities.

Use as a Voltage Logger to record pyranometer output for evaluating insulation.

pyranometer

Voltage logger has a Preheat function

Use as a Clamp Logger and leakage sensor to record and monitor leakage trends.

Use as a Temperature Logger to record warehouse temperatures for visually monitoring temperature changes of products and goods.

Use as an Instrumentation Logger to record pressure sensor output and monitor fluctuations in air or oil pressure.

# Easy operation in just 3 steps !

**STEP 1**

Set up & Record

Install a Data Logger, set an interval, and start measuring.

**Easy to start recording**

Set your recording interval. (from one second to 60 minutes)

Hold the REC button for two seconds to start recording.

**Unlimited installation capabilities**

Magnetic Strap (sold separately)

Wall-mounted Holder (sold separately) Not usable with LR5051

Kickstand (included, except for Model LR5051)

**STEP 2**

Transfer data from Data Logger to PC

Grab the Data Logger from the worksite and connect to a PC.

Download data using infrared communication.

Communication Adapter LR5091

Retrieving the Data Logger

Transfer data from Data Logger to PC using a USB connection

**!** Requires optional Communication Adapter or Data Collector

Using the Data Collector's internal memory, import data from up to 16 Data Loggers installed on site.\*

Download data using infrared communication.

Front Back

Data Collector LR5092-20

Importing to a Data Collector

Retrieving the Data Collector

Transfer data from Data Logger to PC using a USB connection

\* Data for up to 16 channels can be stored. Combine up to 16 single-channel Data Loggers (Models LR5011, LR5031, LR5041, LR5042, and LR5043), or up to eight 2-channel Data Loggers (Models LR5001, and LR5051).

Top surface of LR5092-20

SD Card slot

USB Connector

Using an optional SD Memory Card, the amount of data that can be imported is practically limitless.

Importing to an SD Memory Card

Transfer data from SD Memory Card within Data Collector to PC using USB

or

Transfer data directly from SD Memory Card

**STEP 3**

View graphs and manage data

View data graphically and easily print using the bundled software.

# Advanced Features and Functions

## Install Almost Anywhere

Easily mount the light-weight, pocket-sized loggers in tight spaces.

Actual size

## Recording capacity up to 7 times previous models

Large internal memory stores 60,000 data points per channel. Long-term recording capability exceeds that of previous models.

Interval times	Instantaneous value	Statistical value
1s	16h 40m	-
2s	1d 9h 20m	8h 20m
5s	3d 11h 20m	20h 50m
10s	6d 22h 40m	1d 17h 40m
15s	10d 10h	2d 14h 30m

30m	1250d	312d 12h
60m	2500d	625d

⚠ The maximum recording time depends on battery life. The battery may need to be replaced during long-term recording.

⚠ Customers using the previous Model 3636-20 Clamp Logger should note that the LR5051 can only record 15,000 points of average data, vs. 32,000 data points available in the 3636-20.

## Easy-to-see dual display

Temperature and humidity or current channels can be displayed. View maximum and minimum values while measuring.

## Moist environments

IP54 splash-proof rating withstands operation in extremely humid environments like kitchens and pipe rooms. (Except Model LR5051)

## Record without missing fluctuations

With usual (instantaneous value) recording at long intervals, detailed fluctuations occurring within the intervals are missed. However, with the statistical value recording mode, detailed fluctuations are captured even when they occur during long recording intervals. In STAT mode, measurement is taken every second, and the maximum, minimum, average, and instantaneous values within the specified interval are recorded.

## Transfer data even during recording

Continue to record even when transferring data.

## Batteries last up to 2 years

Energy-efficient design provides up to two years of battery life (For the LR5011 only. Actual battery life depends on model type and settings).

## Never worry about a dead battery

The worry-free backup function preserves measurement data even after the battery dies.

## Replace batteries while recording

Recording continues for about 30 seconds even with the battery removed.

Note. With the LR5001, recording is interrupted during battery replacement if the battery is very weak. After batteries are replaced, recording resumes automatically. Previously recorded data is not lost during battery replacement.

## Never worry about operating errors

Worry-free backup preserves recorded data even if a new measurement is started by mistake.

# Bundled Software Ensures Smooth and Easy Data Analysis

## Import data to a PC and create graphs

Use the **LR5000 Utility** program to import Data Logger data to a PC to make graphs and analyze data further. Easily print results using your PC.

## Show specific values using the cursor function

Use the A/B cursors to select any location on a graph and display its value. The PC software can also calculate maximum, minimum, and average values between A and B cursors.

## Simple file aggregation and management

Transferred data can be combined with data previously transferred (from the same Data Logger unit) into one data on the PC.

## Display data from former Data Logger models

The PC application also supports data collected from the HIOKI 36XX Series Data Loggers.
